# Active Participation in CV-SALTS

---

The participation of all significant stakeholders and geographies is critical to a responsive and robust Salt and Nitrate Management Planning process. Recently the Regional Water Quality Control Board (RWQCB) has asked CV-SALTS and CVSC Chairs for help characterizing participation. Because both membership in CVSC and representation at meetings can take many forms it is difficult to write rigid rules to define participation. Because some permits and other documents require participation in a region-wide SNMP effort the CV-SALTS Executive Committee should provide guidance or factors, however final regulatory permit compliance is the purview of the RWQCB.

## **Coalition Membership**

The Central Valley Salinity Coalition (CVSC) was formed to provide a method for stakeholders to financially participate in CV-SALTS and be represented in an organized manner. CVSC believes that both financial and process representation are critical to participation and success of CV-SALTS.

The CVSC holds that Membership in the CVSC has and should be considered a primary indicator of participation. We have documented the Members of CVSC in accordance with its bylaws. We maintain an accurate listing of members on our website at <http://cvsalinity.org/index.php/background/1-background/6-membership> or on a link directly from the home page. Some CVSC members collaborate in their industry or member groups and as such, those groups, while not listed as CVSC groups, are represented and participating in the CVSC and CV SALTS process. Should the Board have any questions about membership, or participation of a CVSC member, they should inquire of the Chairman or Executive Director of CVSC.

## **Non-Member Active Participation**

If the RWQCB wishes to verify active participation of entities who are not CVSC members, they should request a letter of participation from the Executive Committee in writing or at a regular administrative meeting. The Executive Committee may provide a letter indicating active participation and should consider the following indicators of participation, but may include others as approved by the Executive Committee. The Executive Committee is not required to make a determination and may elect not to forward a letter to the RWQCB. Regulatory standing or permit compliance determinations will be rendered by the RWQCB.

## **Participation Indicators the Executive Committee and RWQCB should consider**

### **Attendance and Engagement**

All committees of CV-SALTS track attendance at meetings and the rosters are provided on the website. Frequent attendance and engagement in committees and meetings are an indicator of participation. Many parties such as dairy and wastewater collaborate to provide industry representation at CV-SALTS activities and meetings. Additional engagement indicators would be participants who chair committees, contribute significantly to subcommittee work, or make presentations to outside groups on CV-SALTS.

### **In-Kind Contributions**

CV-SALTS should also consider in-kind contributions or other support to CV-SALTS as an indicator of participation and especially those who provide studies that are in the CV-SALTS Work Plan or work product that further the Work Plan studies, monitoring or material data approved by the Executive or Technical Committee or provides material technical or policy review support.
