10:00 a.m. **Welcome by David Cory, Chair, Central Valley Salinity Coalition**

David Cory is a farmer and water quality attorney who focuses on agriculturally related water quality issues in the Central Valley. His family has been farming near Dos Palos, CA on the Westside of the San Joaquin Valley for over seventy years. David is actively involved in many Central Valley Water Quality programs that address agriculturally related water quality issues including Central Valley Salinity Alternatives for Long-Term Sustainability (CV-SALTS), the Central Valley Regional Board’s Irrigated Land’s Program and the Grassland Bypass Project.

10:05 a.m. **CV-SALTS and New Nitrate Regulations Coming in 2019**

Water resource experts Timothy Moore and Tess Dunham will discuss, in simple terms, what is CV-SALTS and how does it relate to the new, upcoming nitrate regulations, what are the Basin Plan Amendments for nitrates, and what are Management Zones and what do you need to know about them.

Timothy Moore, Risk Sciences, Nashville, TN.

Tim has been working on water quality issues for more than 32 years and on nitrate issues in California groundwaters for nearly 25 years. He was the lead facilitator in the development of the CV-SALTS Salt and Nitrate Management Plan and related Basin Plan Amendments. Moore served in the same role to aid in developing the very successful Salt and Nitrate Management Plan for the Santa Ana Region that was adopted in 2004.

Tess Dunham, Somach, Simmons & Dunn, Sacramento, CA.

Tess is a leading water quality lawyer and played a critical role in the development of the CV-SALTS Salt and Nitrate Management Plan and related Basin Plan Amendments.

10:55 a.m. **Break**

11:00 a.m. **It’s Time to Start Thinking about Management Zones – A Moderated Panel Discussion**

**Moderator: David Cory**, Chair, Central Valley Salinity Coalition.

**Panelists:**

Parry Klassen, Executive Director, East San Joaquin Water Quality Coalition, Modesto, CA.

Parry Klassen wears many hats in California agriculture. In addition to his duties as Executive Director with 3,949 grower members, Parry is a part time fruit farmer in eastern Fresno County where he grows nectarines and peaches. Since 2003, Klassen has led coalition efforts to implement approaches for solving water quality problems originating from agriculture in the region, www.esjcoalition.org.
J.P. Cativiela, Director of Environmental Regulatory Affairs for the Dairy Cares coalition (www.dairycares.com). J.P. also serves as administrator of the Central Valley Dairy Representative Monitoring Program (CVDMP), a not-for-profit organization of more than 1,100 Central Valley dairy families assembled to conduct monitoring and develop recommendations for groundwater protection. He is a principal of Sacramento-based Cogent Consulting and Communications, Inc.

Michael Cooke, Municipal Services Director, City of Turlock, CA. Michael directs and organizes the City of Turlock’s water, wastewater, and stormwater utilities with a staff of 76 full time employees. The City of Turlock provides water and wastewater services to approximately 19,000 customers. On an average day, the City of Turlock produces 20 million gallons of potable water and treats 10 million gallons of wastewater.

Q & A with Panelists, Tim Moore and Tess Dunham

Thanks for attending this workshop. To participate or stay informed about the Tulare/Modesto pilot nitrate management zones, email info@cvsalinity.org.
