

## CV-SALTS Public Education & Outreach Committee Meeting

---

**When:** **Tuesday, October 22, 2019 from 3:00 PM to 4:00 PM**

**Location:** Teleconference Only

**Conference #:** **(712) 770-5505 Code: 279295#**

### Agenda

1. **Welcome and Introductions**
2. **Approval of [August 13, 2019 Meeting Notes](#)**
3. **Outreach Matrix Update – Mary and Charles**
  - Review Documented Activities and Feedback
    - [Outreach Tracking](#) <- Link Only
    - Press and broader outreach
4. **Discussion - SWRCB Action on 10/16/19**
  - [Press Release Issued by State Water Board](#)
  - [Press Release Issued by CVSC](#)
  - Update Timeline on Page 4 of Outreach Brochure
5. **[Updated Outreach Plan](#) / Next Steps**
6. **Website Refresh**
  - Launch date for new pages
  - Determine what edits need to be made based on SWB 10/16 action
    - o <http://cvsalts.info/>
7. **Documents for Review and/or Approval**
  - [Implementation Postcard](#) to Permittees
8. **Recap Next Steps and [Set Next Meeting](#)**
  - Tuesday, November 12, 2019 from 3:00-4:00 PM
  - Executive Committee Meetings:
    - o October 24, 2019 and November 14, 2019
  - [Proposed DRAFT 2020 Calendar](#)

***One or more Central Valley Regional Water Quality Control Board members may attend.***

## CV-SALTS Public Education and Outreach Committee Meeting ACTION NOTES

---

**Convened:** August 13, 2019 from 3:00 PM to 4:00 PM

**Participants:** Nicole Bell (chair), Charles Gardiner, Mary Currie, Daniel Cozad, Anne Littlejohn, Sam Safi, Walt Plachta, Stephanie Hiestand, Parry Klassen

### Discussion Items

#### Item 1: Welcome & Introductions

- Participants are as indicated above.

#### Item 2: Approval of Minutes of the June 18, 2019 Meeting Notes

- There were no objections, and the June 18, 2019 Meeting Action Notes were approved by consensus.

#### Item 3: Outreach Matrix Update

- Mary Currie provided an update on recent items added to the matrix.
- The committee asked Mary Currie to draft a press release for distribution prior to the SWRCB Public Meeting currently scheduled for September 17, 2019.

#### Item 4: Website Refresh

- Meeting participants reviewed the new website pages. Some of the feedback from the committee:
  - The new pages are not displaying correctly in Internet Explorer.
  - Change the landing page text to read “What” entities and individuals need to know.
  - Fix the spacing on the second row of buttons for Nitrate and Salt Compliance
  - Photo of water pump needs to be replaced
- Members were asked to forward any further comments on the pages to Mary no later than August 30<sup>th</sup>. A link to the new pages will be distributed to the Executive Committee for review at the August 15<sup>th</sup> meeting.

#### Item 5: Documents for Review and/or Approval

- A copy of the final revised [Central Valley Salinity Management: De-Designated Areas](#), and the [updated Timeline](#) for the 4-Page Brochure were included in the package.

**Item 6: Recap Next Steps and Set Next Meeting** – Tuesday, September 10<sup>th</sup> from 3:00-4:00 PM

# Media Release

## State Water Board Approves Central Valley Water Board Plan to Reduce Nitrate Contamination in Groundwater and Provide Replacement Drinking Water

**October 16, 2019**

**Contact:** George Kostyrko  
[George.Kostyrko@waterboards.ca.gov](mailto:George.Kostyrko@waterboards.ca.gov)

**SACRAMENTO** – The State Water Resources Control Board today approved an ambitious, long-term plan to address the buildup of salt and nitrates in Central Valley groundwater basins and surface water, and ensure delivery of clean drinking water to disadvantaged communities impacted by nitrates until impaired aquifers are restored.

Approved after more than 13 years in development by stakeholders and the Central Valley Regional Water Quality Control Board, the plan is the result of an unusual collaboration among agricultural interests, environmental justice advocates, water agencies and residents from impacted communities to address one of the region's most challenging water quality problems.

"This plan is a better, more durable solution because it represents the work of diverse interests coming together to find common ground," said State Water Board Chair E. Joaquin Esquivel. "Salinity and nitrate challenges are not unique to the Central Valley or California, but what is unique is the leadership, collaboration and creativity, that led to development of this critical plan. Implementation is the real focus and challenge now. Further delay only increases the cost and harm to our communities."

The buildup of nitrates in Central Valley groundwater, due largely to decades of irrigating and applying fertilizer to some of the nation's most productive farmland, has made groundwater unsafe for consumption in many rural communities from Colusa to Kern counties. Dairies, wastewater treatment plants and other sources also contribute to nitrate contamination, which can be harmful to human health, particularly for infants.

The first goal of the Central Valley-wide Salt and Nitrate Management Plan is to provide safe drinking water to residents whose water supplies are contaminated with nitrates. Over the longer term, the plan requires farms, dairies and other sources to reduce nitrate discharges so they no longer contaminate groundwater. Ultimately, the goal is to clean up groundwater to meet water quality standards.

The plan allows groups of dischargers to form nitrate management zones and develop implementation plans to provide safe drinking water to impacted residents and implement measures to reduce nitrate pollution. The Central Valley Board would issue permits to ensure dischargers are meeting their goals.

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

STATE WATER RESOURCES CONTROL BOARD

1001 I Street, Sacramento, CA 95814 • Mailing Address: P.O. Box 100, Sacramento, CA 95812-0100 • [www.waterboards.ca.gov](http://www.waterboards.ca.gov)

In approving the plan, the State Water Board directed the [Central Valley Board to return in one year with targeted revisions aimed at strengthening the plan](#). These revisions include:

- Strengthening requirements to reduce nitrate contamination of groundwater basins.
- Accelerating the timeline for achieving this goal. Dischargers will be required to reach this goal within as short a time as practicable, but not to exceed 35 years.
- Requiring enforceable interim deadlines and a final compliance date for dischargers to meet their goal of reducing nitrate discharges.
- Requiring residential sampling programs that provide water quality testing for residents whose water supplies may be contaminated.

Dischargers must identify a method for funding their implementation plans, including paying for replacement drinking water. They may seek funding from other public sources, including local, state and federal funds, but the dischargers are ultimately responsible for timely implementation of their plans.

In addition to addressing nitrate contamination, the Central Valley Board's plan also requires dischargers to develop a comprehensive strategy for addressing their contribution to the buildup of salts in surface waters and groundwater in the Central Valley.

Development of the Central Valley-wide Salt and Nitrate Management Plan began in 2006 when the Central Valley Water Board initiated a collaborative stakeholder initiative, known as [Central Valley Salinity Alternatives for Long-Term Sustainability \(CV-SALTS\)](#).

Following input from stakeholders, state and federal agencies, and the public, the Central Valley Water Board [adopted Basin Plan Amendments in May 2018](#) that implement the salt and nitrate management program across its three major basins – the Tulare Lake and the Sacramento and San Joaquin river basins.

A Basin Plan contains the regulations adopted by each of the nine regional water boards to control the discharge of waste and other controllable factors affecting the quality of waters of the state within the boundaries of the respective regional board. The Porter-Cologne Water Quality Control Act defines “waters of the state” to mean any surface water or groundwater, including saline waters.

The goals of the program are to sustain the Central Valley's lifestyle, support regional economic growth, retain a world-class agricultural economy, maintain a reliable, high-quality water supply and protect and enhance the environment. To support the goals, the amendments include recommendations for new policies and regulatory strategies.

To learn more, [visit the regional board CV-SALTS resource page](#).

**October 14, 2019**

## **For Immediate Release**

Contact: Daniel Cozad, Executive Director  
Central Valley Salinity Coalition, 909-747-5240

### **State Water Resources Control Board Sets Public Meeting October 16, 2019**

to Consider a Resolution Approving the Proposed Amendments to Water Quality Control Plans for Sacramento River and San Joaquin River Basins and Tulare Lake Basin to Incorporate a Central Valley-Wide Salt and Nitrate Control Program

The State Water Resources Control Board (State Water Board) will hold a public meeting at which it will consider adopting a proposed draft resolution approving the proposed Central Valley Regional Water Quality Control Board's (Central Valley Water Board's) amendments to the Sacramento and San Joaquin Basin Plan and the Tulare Lake Basin Plan to incorporate a Central Valley-wide Salt and Nitrate Control Program (Salt and Nitrate Control Program) and also directing the Central Valley Water Board to make targeted revisions to the Basin Plan amendments within one year from the approval of the Basin Plan amendments by the Office of Administrative Law.

The Basin Plan amendments were adopted by the Central Valley Water Board on May 31, 2018 ([Resolution No. R5-2018-0034](#)). The Basin Plan amendments are available for review at the Central Valley Water Board's Salt and Nitrate Control Program Basin Plan Amendment [webpage](#) and here are direct links to the [October 16, 2018, Public Meeting agenda item 3](#), [proposed draft resolution](#), [Response to Comments](#).

The State Water Board will hold the public meeting as follows:

**Wednesday, October 16, 2019 – 9:30 a.m.**

Joe Serna Jr. – CalEPA Headquarters Building Coastal Hearing Room  
1001 I Street, Second Floor, Sacramento, CA 95814

Interested persons will have an opportunity to comment orally on the proposed action as the written comment period has closed. There will be no sworn testimony or cross-examination of interested persons, but the State Water Board and its staff may ask clarifying questions. The State Water Board may consider and adopt changes to the Proposed Final Basin Plan Amendments consistent with the general purpose of the amendments. Webcast of the Hearing will be available here: [State Water Board's Public Meeting Live Webcasts webpage](#).

In addition to the State Water Resources Control Board's approval, the Office of Administrative Law (OAL) must also approve the Salt and Nitrate Control Program, and portions of the Salt Control Program are subject to U.S. Environmental Protection Agency (EPA) approval.

### **New Salt and Nitrate Control Program Need**

The buildup of salts and nitrate pose a threat to drinking water, agriculture, and the environment. Levels have increased in the waters of the Central Valley due to the long-term effects of population growth, application of farm fertilizers and soil amendments, food processing, and other industrial activities and municipal water use. The new Salt and Nitrate Control Program is designed to address both the past accumulation of salt and nitrate in groundwater and the ongoing issue of nitrate and salt accumulation. The primary focus for the first ten years of the program is to provide safe drinking water for users currently affected and reduce the level of nitrate affecting groundwater supplies used for drinking water.

The goals of the Salt and Nitrate Control Program are to provide safe drinking water to the Valley's residents; sustain the Valley's agricultural lifestyle, support regional economic growth, retain a world-class agricultural economy, maintain a reliable, high-quality water supply, and protect and enhance the environment. To support the goals, the Salt and Nitrate Control Program includes recommendations for new policies and regulatory strategies including:

1. Short- and long-term solutions for salt and nitrate discharges from municipal, agricultural, and industrial activities while first focusing on providing safe drinking water supplies in identified high-priority areas of the Central Valley.
2. A new regulatory framework that moves away from the current "one-size fits all" regulations and provides more locally focused nitrate regulations to better address the Central Valley's natural diversities (e.g., climatic, hydrologic, geologic) while protecting water quality and maintaining a strong economy.
3. Long-term restoration of groundwater quality where reasonable, feasible, and practicable.

In the Central Valley, salt and nitrate discharges by agricultural, municipal, and industrial activities are subject to the regulations of the Regional Board. New and improved management practices have already been implemented to reduce salt and nitrate discharges, but compliance with current regulations is difficult and, in some areas of the Central Valley, likely impossible.

### Key Regulatory Changes Included in New Salt and Nitrate Control Program

- The Regional Board will be able to require municipal, agricultural, and industrial dischargers to provide safe drinking water supplies in identified high priority areas of the Central Valley that include the Kaweah, Turlock, Chowchilla, Tule, Modesto, and King basins or subbasins.
- Dischargers will have alternative compliance pathways for meeting the Regional Board's regulations for nitrate discharges: Path A – Individual Permitting Approach and Path B – Management Zone Approach.
- Dischargers will have the flexibility to work together and form **Management Zones** where dischargers can collaborate to develop more cost-effective discharge controls and groundwater management approaches for nitrate while first providing safe drinking water. Members of a management zone will work together to assure zone residents have safe drinking water. In exchange, the zone participants are allowed more time and flexibility to achieve nitrate compliance. The Regional Water Board provides guidance, oversight, and necessary approvals for management zone creation, planning, and implementation.

### Additional Background

Over the last decade, the Central Valley Salinity Coalition (CVSC) has worked side-by-side with the Regional Water Board to prepare the January 2017 *Salt and Nitrate Management Plan* (SNMP) – the basis for the new Regional Water Board Salt and Nitrate Control Program. For a quick overview of the SNMP and Basin Plan amendment process: <https://www.cvsalinity.org/docs/committee-document/pubic-education-and-outreach-docs/3756-cv-salts- outreach-brochure/file.html>

The Central Valley is the epicenter of California's economy—encompassing 40% of the state and providing water for people and businesses from San Francisco to San Diego, as well as food for California, the nation, and the world. Over the last 150 years, increased agricultural, industrial, and municipal activities, coupled with population growth, have resulted in dramatic increases in salts and nitrates in groundwater, soils, and surface waters. In some communities, the nitrate concentrations have caused unsafe drinking water. Salt accumulations have resulted in the loss of 250,000 productive acres, and 1.5 million acres have been declared salinity impaired. If not addressed, the economic impacts of salts and nitrates on the Valley are estimated to exceed \$3 billion year.<sup>1</sup>

---

<sup>1</sup> [https://www.waterboards.ca.gov/centralvalley/water\\_issues/salinity/centralvalley\\_salinity\\_alternatives\\_archive/s/committees\\_of\\_cvsalts\\_leadership\\_grp/social\\_economic\\_impact\\_committee/sec\\_12may08\\_howitt\\_pres.pdf](https://www.waterboards.ca.gov/centralvalley/water_issues/salinity/centralvalley_salinity_alternatives_archive/s/committees_of_cvsalts_leadership_grp/social_economic_impact_committee/sec_12may08_howitt_pres.pdf)

The Regional Water Board oversees the regulation of agricultural, municipal, and industrial waste discharges of nitrates and salts within the Central Valley. The Regional Water Board uses Basin Plans as the basis for regulating water quality. <http://www.waterboards.ca.gov/centralvalley>.

In 2006, a coalition of stakeholders, including federal, state and local agencies, permitted dischargers (e.g., growers, ranchers, municipalities, food processors), and environmental justice groups, started discussing how to maintain a strong economy while ensuring safe drinking water. This collaborative initiative is called the **Central Valley Salinity Alternatives for Long-Term Sustainability** (CV-SALTS) and this is the website: [www.cvsalinity.org](http://www.cvsalinity.org)

In 2008, the Central Valley Salinity Coalition (CVSC) was formed to help fund the technical and scientific studies necessary to support the development of alternative regulatory approaches. CVSC is a non-profit coalition of public agencies, business, associations and other members working together to better manage salt and nitrates in the Central Valley of California. The CVSC formed to organize, facilitate, and fund efforts needed for the efficient management of salinity and nitrates in the Central Valley.

**Current Members of CVSC include:**

San Joaquin Valley Drainage Authority, California Association of Sanitation Agencies, California League of Food Producers, The Wine Institute, Dairy Cares, City of Fresno, City of Davis, City of Manteca, City of Modesto, City of Tracy, City of Stockton, City of Vacaville, Central Valley Clean Water Agencies, South San Joaquin Water Quality Coalition, Northern California Water Association, Tulare Lake Drainage and Water Districts, Stockton East Water District, California Cotton Growers and Ginners Association, California Rice Commission, San Joaquin Tributary Authority, Western Plant Health Association, East San Joaquin Water Quality Coalition, San Joaquin County & Delta Water Quality Coalition, Pacific Water Quality Association, Sacramento Regional County Sanitation District, California Resources Corporation, Westlands Water District, Valley Water Management Company, and California Independent Producers Association.

## Updated CV-SALTS Outreach Approach - October 17, 2019

The following outreach, education, and engagement tactics are included in the scope for the grant received by Kings River Watershed Coalition Authority. This information was originally presented in January 2019 and has been updated for the remainder of 2019 into mid-2020.

New or revised information is noted in red.

### 1. Update of the General Outreach Brochure

The existing CV-SALTS general outreach brochure and industry-specific fact sheets have been effective outreach tools, providing basic information about the challenges and coming regulations. As these items have utility for outreach in 2019, they will be updated as needed. As agreed by the PEOC and Executive Committee, once the State Board adopts the Basin Plan Amendments (likely October 16, 2019), the timeline on page 4 of the brochure will be updated. It was not determined if more brochures would be printed.

In December 2018, two facts sheets were developed (and distributed at the two December workshops and posted online) to provide an overview of the compliance pathways and requirements for the Nitrate Control Program and the Salt Control Program. These fact sheets could be combined as a **second outreach brochure** to highlight the timeline and requirements for each program and serve as a supplement the original general outreach brochure. The PEOC expressed support for the development of an implementation-oriented brochure that would be targeted for the six high priority areas. The brochure would include information about the two pilot management zones underway now, the new Nitrate Control Program, with a sidebar about the Salt Control Program.

PROPOSED TIMELINE: The second outreach brochure could be drafted in November 2019 and finalized by January 2020.

### 2. Website Refresh

A refresh of the homepage of the CV-SALTS website is envisioned to link to a revised landing page for easier access to public information materials.

PROPOSED TIMELINE: Go live with new website content following State Water Board approval of the Basin Plan Amendments (now set for October 16, 2019).

### 3. Workshops

Two well-attended and successful outreach and education workshops were held in December 2018 in Modesto and Tulare. Building on this success, one additional workshop will be planned for two locations in the six high priority basins and subbasins.

It is recommended that the PEOC discuss the following options (or others?):

1) Is going forward with one workshop, off growing season, the best “bang for the buck”?

2) Should greater effort should be placed on getting CV-SALTS on the agendas of various conferences/events to present CV-SALTS?

Upcoming four conferences below are recommended as the priorities:

**ACWA Fall Conference – Dec. 3-6, 2019** in San Diego

<https://www.acwa.com/events/2019-fall-conference-exhibition/>

Contact: Adam Borchard, [adamb@acwa.com](mailto:adamb@acwa.com)

Deadline for being a part of a session or panel: I left a message and wrote email to Adam for details.

Presenter: Daniel Cozad with David Cory, Parry Klassen, or \_\_\_\_\_

**California Irrigation Institute Conference - January 27-28, 2020** in Sacramento

<http://www.caii.org/>

Contact: email: [Kathryn@ChandlerAg.com](mailto:Kathryn@ChandlerAg.com), phone: (559) 960-3871

Presenter: Parry Klassen with \_\_\_\_\_

**Tulare Farm Show/World Ag Expo, Feb 11, 2020** in Tulare

<https://www.worldagexpo.com/2013-world-ag-expo>

Phone: (800) 999-9186 or (559) 688-1030 and Email [info@farmshow.org](mailto:info@farmshow.org)

Presenters: Parry Klassen and Charlotte Gallock

**California Dairy Sustainability Summit March 25-26, 2020** at Ca Expo in Sacramento

<https://www.cadairysummit.com/> General Inquiries: Michael Boccadoro, Dairy Cares, [m.boccadoro@dairycares.com](mailto:m.boccadoro@dairycares.com), 916-441-4383

Presenter: J.P. Cativiela and \_\_\_\_\_

Other conferences to consider attending and any others?

**AGWA – AGWT Annual Groundwater Conference** - February 19-20, 2020 in Ontario

<https://agwt.org/civcrm/event/info%3Fid%3D300%26reset%3D1>

**Agricultural Council of California** - it looks like hold an Annual Meeting in March 2020 - no information available yet <http://www.agcouncil.org/2019-annual-meeting-centennial-celebration>

**California Small Farm Conference** - their 2019 conference was in February, so perhaps their 2020 conference will be in February 2020.

**PROPOSED TIMELINE:** October, identify the preferred approach and initiate action.

#### 4. Video

In December 2019, video footage was recorded of the Tulare Workshop with additional interviews with three experts. In early 2019, the first video resulting from these recordings was made available and tells the story of CV-SALTS, the new regulations, and what is coming. It is envisioned that, drawing from the same footage, a short video that focuses on “Management Zones” could be produced. Further, the video of the workshop itself could be produced into a standalone piece or potentially another short video with existing footage or new interviews. **As**

the footage has not been catalogued, the time consuming portion of the work would be to review the footage specifically for Management Zone related information.

It is recommended that the PEOC revisit the idea of making of a second video as a more cost-effective and more doable option could be to add voiceover (Daniel Cozad, Patrick, and/or others) presenting the approved PowerPoint and making that available online and for sharing.

PROPOSED TIMELINE: Calendar this October-December, with Daniel and others – Complete by the end of the year for others to use in presentations in #3 above and elsewhere.

5. PowerPoint Presentation

A general information PowerPoint presentation for use by the PEOC, Executive Committee, and Executive Director at speaking engagements will be developed from existing presentations. To support the use of the PowerPoint presentation, several speakers, preferably from each of the six high priority areas and from diverse industries will be identified and trained to present the PowerPoint via webinar.

It is recommended that several slides about the two pilot management zones be developed as an additional module for the PowerPoint. It is also recommended that key “sound bites” or added key messages be added to each slide. An orientation or training for interested presenters (CVSC Executive Committee members, leaders in the high-priority areas) could be scheduled.

PROPOSED TIMELINE: Update slides in October to coordinate with voice-over in #4 above.

6. Social Media Refer to #7 below for a revised approach for social media.

7. Leverage Existing Outreach Materials for Partner Newsletters, E-Blasts, Social Media

The CV-SALTS related information that has been developed can be repurposed to support broad education of the regulated community through existing trade publications and newsletters. Each Executive Committee member would be asked to share information through their organizations existing communication channels that may include a newsletter, e-newsletter, social media platforms, e-mail lists, etc. Interviews with CVSC members in early 2019 identified the potential communications avenues. For example, the California Association of Sanitation Agencies (CASA) has an e-newsletter that goes out every two weeks to its members.

As implementation is nearing, short Information pieces/blurbs would be developed and circulated to Executive Committee members for distribution in the first week of the following month. Each piece developed will include a link to the new website content at cvsalts.info. To make this approach most effective for audiences in the six high priority areas, it is critical that organizations within these areas be identified for information sharing.

A short, educational/informational piece would be approved at the end of each month for distribution in the first week of the next month. Perhaps a streamlined approval process could be implemented whereby the content is written now (November) and let the CVSC Executive Committee know the topics available to draw from to add to their websites or to send out in e-blasts.

Here are some possible topics to consider:

October 2019	New regulations are coming following approval by State Water Board. What changed with the state board approval – this is a Tess bullet list to start.
November 2019	Timeline for Nitrate Control compliance
December 2019	Nitrate Control Program choices
January 2020	Lessons learned from the two Management Zone Pilot Programs
February 2020	Steps to forming a Management Zone

This informational distribution approach would continue through 2020.

PROPOSED TIMELINE: Draft topics in October 2019 for approvals.

#### 8. Newspaper Media Strategy

The suggested media strategy would be to develop relationships with local papers that serve the six high-priority areas. These local newspapers would be provided a briefing about CV-SALTS including the pertinent materials developed. Building a relationship between CVSC leaders and local papers will be instrumental in increasing stakeholder exposure to the regulations. We could explore identifying a long-time family farmer, Supervisor, City Council, etc. in a high-priority area to submit written pieces under their name. We could develop a standard structure of the written pieces and tailor the local details.

The following are the key local papers to approach initially.

Modesto: Modesto Bee

Turlock: Modesto Bee, Turlock Journal

Chowchilla: Merced-Star, Madera Tribune

Kings (includes Fresno and Clovis): Fresno Bee

Kaweah (includes Visalia, Tulare): Visalia Delta Times, Tulare Advance-Register

Tule (includes Tipton, Pixley, Earlimart, Porterville): The Bakersfield California,

Porterville Recorder

PROPOSED TIMELINE: Do the briefings in early 2020 and follow-ups closer to Notices to Comply being sent out.

## NOTICE

### Central Valley Regional Water Quality Control Board Permit Holders

---

The California Water Resources Control Board approved the CV-SALTS Basin Plan Amendment which regulates all Central Valley Waterboard permit holders.

You will receive a notice to comply with these regulations from the Central Valley Waterboard in January. These regulations provide options for you to economically comply with the new requirement, but you need to understand the options to be able to choose wisely. High Priority Areas for Nitrate issues will be notified of their requirement to comply with the regulations individually or join a Management Zone for group compliance. For salinity, permittees can comply with conservative limits or participate in the P&O Study. To learn more about your options and requirements go to [www.cvsalts.info](http://www.cvsalts.info)
