

Salt Control Program Webinar – Draft Outline

The following is an initial outline for a CV-SALTS webinar on the Salt Control Program requirements and the Prioritization & Optimization (P&O) Study. The target audience is industry leaders, permittees outside of coalition permits (those other than irrigated lands and dairies), and consultants for regulated dischargers.

Date and Time: Tuesday, December 15, 2:00 to 4:00 p.m.

Presenters: Patrick, Daniel, Tess, Anne, Richard

- I. Welcome and Introductions**
 - a. Introduce presenters
 - b. Review purpose, agenda, format, and procedures for asking questions

- II. Salt Control Program Overview**
 - a. Salt Control Problem
 - b. Background and history of CV-SALTS
 - c. Basin Plan Amendments for nitrate and salinity
 - d. Salt Control Program goals and timeline
 - e. Questions and discussion

- III. Salt Control Permitting Options**
 - a. Overview of Options: Individual and Alternative
 - b. Option 1: Individual Permitting – More rigorously documented individual permitting compared to current compliance
 - i. Ideal for permittees with long monitored compliance data and history – likely to be additional work to document and forecast compliance
 - ii. Irrigated lands coalitions and dairy are doing Option 2
 - c. Option 2 – Join P&O Study
 - i. Benefits of joining P&O Study
 - ii. Fees and payment process
 - d. Questions and discussion

- IV. P&O Study Overview**
 - a. P&O Study purpose, objectives, and timeline
 - b. Near-term activities and discussions
 - c. Roles for industry leaders, permittees, and others

- V. Questions and Discussion**
