

## CV-SALTS Website Redesign

### Primary goals:

- Migrate to new more stable and upgradable platform
- Continue to be a library for existing and new documents and materials
- Accommodate range of users (new interest in P&O study, MZ interest, etc.)
- Provide clearer explanation of CV-SALTS and its programs
- Improve About Us sections
- Use clear, plain language and navigation to improve accessibility for all users
- Modernize website look and navigation
  - Remove sidebar
  - Update top drop-down menus

**PEOC Discussion Question:** Are there other goals for improving the CV-SALTS website?

### Good website examples:

We think these websites provide great inspiration and ideas for the new homepage and other updates.

- <https://deltarmp.org/>
- <https://www.sfestuary.org/>
- <https://www.sbvwd.org/> (this one is designed by the current CV-SALTS web team)

**PEOC Discussion Question:** What features or design elements from these sites are desirable or well-suited for the CV-SALTS website?

### Process:

- Identify existing website content to archive, keep live, etc. [Daphne with assistance from Richard and Daniel]
- Redesign home page and sub-pages (navigation, functionality, content) [Charles, Aaron, Daphne]
- Work with YellowWebMonkey to simultaneously convert to WordPress and implement redesign [Daphne and Aaron]
- Discussion and review at October and November PEOC calls. [All]

### Target Timeline:

- Review goals and website examples with PEOC – October 19
- Develop home page and site navigation framework for review by PEOC – November 16
- Complete site layout and archive by end of December. Go live.
- Review and refine as necessary at January PEOC meeting.
