Subject: Re: E Logs and Well Construction

JJ,

I was unable to find any construction or elog data relating to the wells located on section 1 township 21 and section 11 township 21. Both wells where constructed during the 1950's and the records can not be found. The pump setting on both instances is below 800', and the static water water level is 350' or more. We are certain that both wells are pumping below the Corcoran Clay. I may be reached anytime for further questions. I will also get the last work logs for each well to verify pump setting depth.

Thanks Ceil
